Pasyngtova, Anna.
THE RELATIONSHIP OF MITOCHONDRIA TO MALIGNANT GROWTH. [1961][17]p. 3 refs.
Order from SLA mi$2.40, pi$3.30 61-10760

Trans. of Arztliche Forschung (West Germany) 1959, v. 14, no. 9, p. 454-460.

Oxidative-reduction processes in the cell are closely bound to the presence and activity of mitochondria. Among the fundamental characteristics of malignant tissues is a markedly reduced oxidation capacity. The number of mitochondria in neoplastic cells amounts to about one fourth of that found in normal cells. Theoretically the use of mitochondria, which have been shown to be capable of extracellular life in vitro and which could be obtained in large amounts, might represent an ideal therapy.
